

FoamPackage

PRODUCT & SERVICE CATALOGUE

From the Design Desk to the Factory Floor: Zero Tolerance, Measurable Trust

Engineered foam packaging, separators and returnable transport systems for automotive and industry — Istanbul, Türkiye

foampackage.com info@foampackage.com · +90 530 905 73 60

Who we are

FoamPackage is the Istanbul-based engineering and export brand of a manufacturing group with 22 years of experience in technical foams and protective packaging.

We handle design, CAD work, prototyping and international customer communication. Series production runs at our ISO 9001 / ISO 14001 certified partner production facilities in Istanbul, under established quality control.

Our customers are automotive OEMs, Tier-1 suppliers and industrial manufacturers who need parts to arrive undamaged, sorted and ready for the line.

Why FoamPackage

CAD-based design

We work from your STEP / DWG / PDF drawings or sample parts and design the insert around the real part.

±0.5 mm CNC tolerance

Published cutting tolerance for CNC-cut foam parts (thermoforming excluded).

No tooling for samples

CNC samples need no tooling cost; only thermoform parts require a mould.

First reply in 24–48 h

A technical first response within 24–48 hours of receiving your drawing.

Samples from 1 piece

Prepared in 2–5 working days; sample terms are stated in the quote.

Export-ready delivery

DDP / DAP or EXW / FCA. Road delivery to Germany in 5–10 working days.

Products

01

Fabric Separators

Fabric pocket dividers for KLT and large containers. Each part sits in its own pocket — no contact, no scratches on painted or chromed surfaces.

Applications: Painted trim, bumpers, lamps, interior parts

02

Dynamic Racks & Transport Systems

Wheeled racks and trolleys with fabric pockets or foam supports for in-plant and supplier-to-line transport.

Applications: Body panels, doors, large painted parts

Products

03

Thermoform Separators

Vacuum-formed trays and separators shaped to the part, stackable and reusable in returnable containers.

Applications: Metal parts, electronic components, small assemblies

04

Polyethylene (PE) Foam

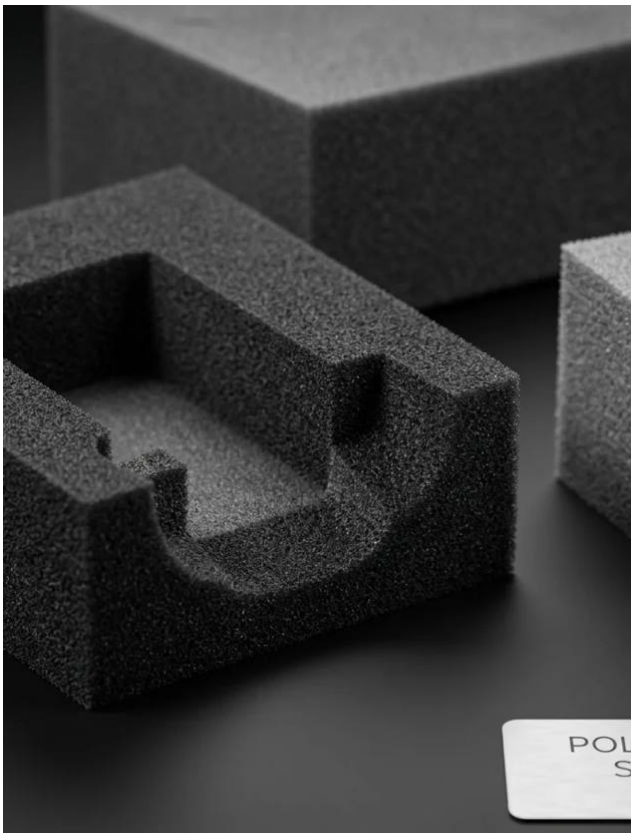

Closed-cell, lightweight and moisture-resistant. CNC-cut inserts, pads and profiles.

Applications: Automotive, white goods, electronics

Density	**18–45 kg/m³**
Service temp.	**−40…+80 °C**
Thickness	**1–100 mm**

Typical values; final values are confirmed per project.

Products

05

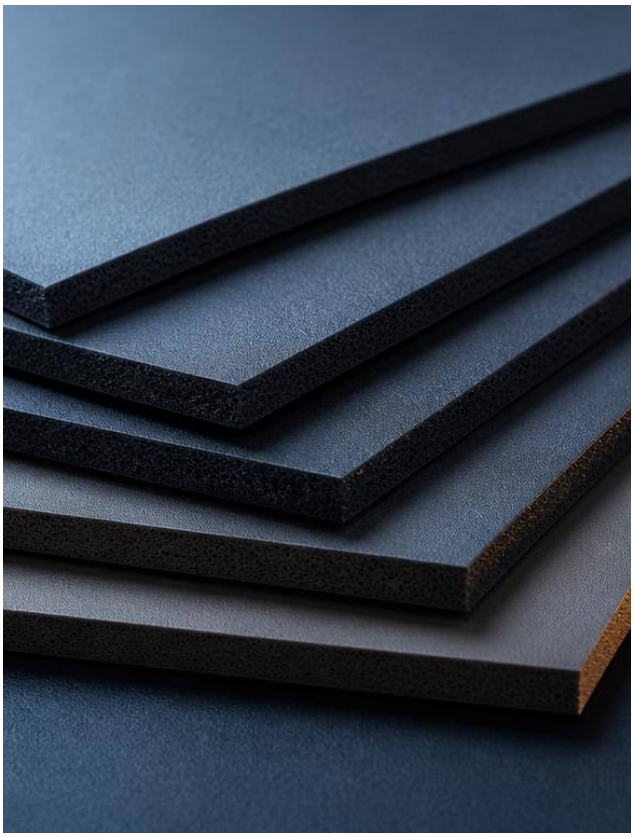

Polyurethane (PU) Foam

Open-cell, soft foam for sensitive surfaces; antistatic grades available.

Applications: Electronics, medical devices, precision parts

Density	**15–60 kg/m³**
Service temp.	**−30…+100 °C**
Thickness	**3–200 mm**

Typical values; final values are confirmed per project.

06

EVA & EPDM Foam

EVA for high-density, durable inserts; EPDM for sealing and weather resistance.

Applications: Tool cases, glass, sealing applications

Density	**EVA 30–250 · EPDM 60–200 kg/m³**
Service	**EVA −40…+70 · EPDM −40…+120 °C**
Thickness	**1–50 mm**

Typical values; final values are confirmed per project.

Products

07

XLPE (Cross-linked PE)

Fine-cell, smooth-surface cross-linked foam with high dimensional stability.

Applications: Premium inserts, automotive interiors

Density	**25–200 kg/m³**
Service temp.	**−60…+100 °C**
Thickness	**1–50 mm**

Typical values; final values are confirmed per project.

08

Flocked Foam

PE or PU base with a soft flock surface for premium presentation and scratch protection.

Applications: Jewellery, cosmetics, premium products

Density	**25–45 kg/m³**
Service temp.	**−20…+70 °C**
Thickness	**3–50 mm**

Typical values; final values are confirmed per project.

Products

09

Edge Guards & Profiles

Foam corner and edge profiles to protect edges and surfaces during handling and shipping.

Applications: Furniture, glass, panels, white goods

10

Foam Separators

Grid and slotted foam dividers that keep parts apart inside boxes and crates.

Applications: Bottles, components, spare parts

Products

11

Foam Pads & Bags

Foam sheets and bags for wrapping and cushioning individual parts.

Applications: Spare parts, ceramics, e-commerce

12

Sheets & Rolls

PE foam in sheet and roll form for surface protection and in-house cutting.

Applications: Flooring, construction, general packaging

Density	**18–200 kg/m³**
Service temp.	**−40…+80 °C**
Thickness	**0,5–100 mm**

Typical values; final values are confirmed per project.

Industries we serve

Automotive
OEM and Tier-1 parts: painted trim, lamps, interior and metal parts in KLT and racks.

Electronics
Antistatic foams and trays for boards and components.

White goods
Edge guards and inserts for appliances and panels.

Medical & precision
Clean, accurate inserts for devices and instruments.

Defence & tooling
Durable EVA / PE inserts for cases and equipment.

Glass & furniture
Profiles and separators against breakage and scratches.

Application example: painted trim parts, Kocaeli / İzmit

Before: cardboard dividers — scratches, contact damage

Fabric separators in the same KLT

Thermoform tray for smaller parts

Dynamic rack for line-side transport

Representative example based on a typical Tier-1 project. Photos show the solution types.

Companies we have supplied in Türkiye (directly or through their supply chain):

HYUNDAI · Ford · assanhanil · odelo Automotive Signal Lights · FARBA · BMC · TürkTraktör · farplas · PLASTIC OMNIUM · BLR BALORMAN · weg

Quality & certificates

- Series production at ISO 9001 and ISO 14001 certified partner facilities in Istanbul.
- Certificates are shared on request during supplier qualification.
- Dimensional checks against drawing; ±0.5 mm CNC tolerance.

Logistics & terms

- Incoterms: DDP / DAP or EXW / FCA.
- Germany by road: 5–10 working days.
- Urgent ready samples by air: 1–2 working days.
- No fixed minimum order quantity.

From drawing to series production

1

Send your drawing

STEP, DWG, PDF or photos with dimensions; upload up to 20 MB on our website.

2

Concept & quote

Technical first reply within 24–48 h, then material proposal and quote.

3

Sample

From 1 piece, 2–5 working days. Sample terms are stated in the quote.

4

Series production

Production at certified partner facilities and delivery to your plant.

Let's talk about your part

Send us a drawing or a photo of the part — we reply within 24–48 hours.
